PROFESSIONAL SUMMARY

Computer Science undergraduate (AI & ML) with hands-on experience building and shipping products end-to-end — from problem discovery to design to technical execution. Led a 65-member technical club through operational strategy and stakeholder management. Seeking a Product Management internship to apply structured decision-making, user-centric design, and cross-functional execution to real-world problems.

EDUCATION

Vellore Institute of Technology, Bhopal

May 2027

B.Tech, Computer Science and Engineering (AI & ML) | CGPA: 8.63

SKILLS

Product: Product Thinking, Product Strategy, User-Centric Design, Requirement Analysis, Feature Prioritization (MoSCoW/RICE), Product Roadmapping, User Journey Mapping, MVP Scoping

Leadership: Team Leadership, Stakeholder Management, Cross-functional Collaboration, Decision Making, Execution

Technical Fluency: Python, SQL, OpenCV, Git, Streamlit, REST API Integration

Tools: Figma, Jira, Notion, Google Analytics

PROJECTS

Smart Fitness Trainer | Personal Product — *In Development* (Python, OpenCV, MediaPipe)

- Identified the lack of real-time form guidance as a key barrier for home-fitness users through secondary research and informal user conversations, defining the core product requirement for a vision-based coaching solution.
- Scoped and prioritized MVP features using a must-have/nice-to-have framework, balancing pose-detection accuracy against real-time performance constraints.
- Designed the user journey around immediate feedback loops (form correction cues, rep counting) to drive workout consistency; built and iterated the feedback engine using MediaPipe Pose and OpenCV.
- Currently migrating backend from SQLite to Supabase to support user accounts and progress tracking ahead of a planned pilot rollout.

Medi-Genie | Healthcare Product — *In Development* (Python, Flutter, Firebase)

- Ideated a healthcare platform to simplify appointment booking and medication management, identifying accessibility gaps through secondary research and informal feedback from potential local users.
- Defined MVP feature set through structured requirement analysis and feature prioritization, focused on reducing booking friction (streamlined flow from 6 steps to 3).
- Owned the product lifecycle end-to-end — requirements, design, and implementation — as a solo builder, with a phased plan for local clinic pilot testing as next step.

Pahal Interface (PAHAL EPICS) | Community Service Project — *Built, Pre-Launch* (MERN Stack)

- Led a 5-member team using Agile/Scrum methodology to build an NGO operations platform, balancing technical constraints against community-defined needs.
- Facilitated stakeholder conversations with NGO partners to define project scope and prioritize features for volunteer coordination and impact reporting.
- Delivered a pilot-ready platform currently awaiting NGO partner onboarding; scoped rollout plan for initial deployment.

LEADERSHIP EXPERIENCE

BitByBit Technical Club | Lead of Operations

Jun 2025 – Apr 2026

- Led operational strategy for a 65-member technical club, executing 3 flagship events including a university-wide fest that achieved the highest turnout among 100+ participating clubs.
- Managed stakeholder relationships and resource allocation across events, ensuring on-time, on-scope delivery.
- Identified and resolved recurring operational bottlenecks, improving team workflow efficiency across event cycles.

BitByBit Technical Club | Social Media Lead

Dec 2024 – Apr 2026

- Led a team of 6 to execute a cohesive content and communication strategy, aligning brand identity with student community interests.
- Used data-driven analysis of audience behavior and content trends to reshape social strategy, growing the club into one of the most recognizable technical pages on campus.
- Experimented with content formats and posting cadence to systematically test and improve engagement.

CERTIFICATIONS

- AWS Certified Cloud Practitioner | AWS
- Cloud Computing | NPTEL
- Machine Learning in Python | Coursera
- T-Hub Innovation Workshop | T-Hub

EXTRACURRICULAR ACTIVITIES

- NCC: Awarded "A" Certificate; demonstrated leadership, discipline, and adaptability.
- Service: Volunteer, Swachh Bharat Abhiyan.
- Competition: Active participant in University Hackathons.
- Exhibitions: Project Head of two college technical exhibitions; managed team and logistics.
