PROJECTS

Smart Fitness Trainer | Python, OpenCV, MediaPipe, scikit-learn, pyttsx3 | [Github link](#) | AI Developer

- Engineered an AI-powered fitness application using computer vision and machine learning for real-time exercise tracking, form analysis, and personalized coaching feedback.
- Implemented a voice-guided coaching system using asynchronous TTS, providing contextual posture and range-of-motion correction.
- Designed a modular architecture for real-time processing, session analytics, and data export features for comprehensive progress tracking.

Pahal Interface | Python, Django, MySQL, AWS S3, Razorpay | [Github link](#)

- Developed a full-stack NGO management platform to streamline donation tracking, volunteer coordination, and impact analysis.
- Integrated Razorpay for secure transactions and utilized AWS S3 for scalable cloud storage to enhance operational efficiency.
- Implemented role-based access control and a real-time admin dashboard for monitoring donations, educational content, and volunteer registration.

Medi-Genie | Next.js, React, TypeScript, Node.js, Express | [Github link](#) | Full-stack Developer

- Engineered a comprehensive healthcare web application offering online doctor consultations, medication reminders, and appointment scheduling.
 - Implemented a responsive user interface using React and Next.js for finding nearby clinics and pathology labs.
 - Built secure backend RESTful APIs with Node.js and Express for user authentication and appointment management.
